PREFACE

NEW THIS YEAR

The list of content sections and table names at the beginning of the digital report have been hyperlinked to the tables. Click on the title of a content section or a table and you will be automatically directed to the actual content section or table in the report.

This report provides the detailed results for each question from this school/districts 2015-16 *California School Parent Survey* (CSPS), presented in tables organized by topic.

The CSPS is specifically designed to provide data to help foster better parent involvement, one of the required priorities of Local Control and Accountability Plans (LCAP). (Henceforth, the word "parent" is used to refer to any adult in a household with parental or guardianship responsibilities.) It also provides data to help meet three other LCAP priorities: enhancing academic achievement, school climate, and pupil engagement. It aims to raise awareness of how well the school is doing in its parent involvement efforts and what are the needs and concerns of parents that it should address. It provides a means to confidentially obtain parent perceptions about learning and teaching conditions, school climate, and parent-school involvement and relationships, including whether the school environment is academically challenging, caring and welcoming, participatory, safe, and fair. More information about the survey is available on its website: csp.s.wested.org.

THE CAL-SCHLS SYSTEM AND LOCAL CONTROL AND ACCOUNTABILITY PLANNING

The CSPS, along with its two companion surveys—the *California Healthy Kids Survey* (CHKS) and the *California School Climate Survey* (CSCS) for staff—is a service of the California Department of Education (CDE). These three surveys form the *California School Climate, Health, and Learning Survey* (Cal-SCHLS) System, the largest, most comprehensive effort in the nation to assess students, staff, and parents at the local level on a regular basis to provide key data on school climate, learning supports and barriers, and stakeholder engagement; as well as overall youth development, health, and well-being (see cal-schls.wested.org). The surveys provide a wealth of information to guide school improvement efforts and meet Local Control and Accountability Plan (LCAP) requirements and goals.

The CDE funds the Cal-SCHLS system to provide schools and communities with local data that will assist them in: (1) fostering positive school climates and stakeholder engagement in learning; (2) preventing youth health-risk behaviors and other barriers to academic achievement; and (3) promoting positive youth development, resilience, and well-being. These surveys grew out of CDE's commitment to helping schools promote the successful cognitive, social, and emotional development of all students and create more positive, engaging school environments for students, staff, and parents.

In addition to providing data to guide *improving academic achievement, school climate, pupil engagement, and parent involvement*, the CSPS, and Cal-SCHLS overall, are especially valuable for supporting LCAP efforts in three other respects:

- Providing data to determine whether a school fosters the supports, conditions, and specific competencies needed to meet a fifth priority: the Common Cores State Standards.

- Supporting the priority of fostering achievement among foster youth, low-income, English language learners, and other high-need subgroups, by enabling LEAs to determine how survey results that affect achievement vary across these subgroups.
- Serving as a data collection tool to identify or monitor other local needs by adding additional questions.

For more information, see Helpful Resources for Local Control and Accountability Plans and School Safety Plans, available at surveydata.wested.org/resources/LCAP_Cal_SCHLS.pdf.

THE IMPORTANCE OF PARENTAL INVOLVEMENT

Parental involvement in the school and their child's education is one of the important characteristics of a positive school climate and quality schooling. A large and growing body of evidence has linked school success to the manner and degree to which a school communicates with parents, engages them both in school activities and education, and fosters a school climate that parents perceive as warm, inviting, and helpful—all variables assessed by the CSPS.

Involving caring adults and family members is absolutely essential to creating a safe, caring, challenging, participatory, and supportive school climate. Social relationships or ties among students, parents, teachers, and administrators are a key component of school improvement efforts and are a common characteristic of effective schools. When parents are involved at school, children perform better in terms of both behavior and academic achievement, they stay in school longer, and they learn better.

Positive relationships or ties among students, parents, teachers, and administrators, and the fostering of parental support for education are key components of effective schools. Many studies show that parent and other family involvement in children's learning is a critical element of student success.

SURVEY CONTENT OVERVIEW

The CSPS serves two primary purposes. First, it addresses most of the key issues in regard to parental involvement in both the school and their own child's education. Second, it provides feedback on how parents view school climate conditions, their perspective on the degree to which positive factors exist in a school. It asks parents and guardians to rate their own experience as school partners through questions like *This school keeps me well-informed, promptly responds [to me], encourages me to be an active partner*, etc. The survey content, as organized in this report, covers several key content areas:

1. Characteristics of Parent Respondents and their Children
2. Student Support (learning environment and supports, school discipline, cultural sensitivity, opportunities for meaningful student participation)
3. Parental Support and Involvement
4. Perceptions of Student Risk Behaviors (how much of a problem at the school)

New for 2015-16, questions were added to further enhance the survey as a resource for guiding LCAP parental involvement efforts and to better align the survey's content with the staff and student surveys so information obtained across these three stakeholder groups can be compared, as illustrated in Exhibit 1.

New questions include: the biological relationship of the parental respondent to the child; participation in afterschool programs; the degree to which teachers communicate with parents, and parents feel welcome to participate in the school and that their concerns are taken seriously; and the specific activities that a parental respondent may have been involved in and specific type of information the school may have provided.

SURVEY ADMINISTRATION AND SAMPLING

Surveys were administered by school staff using detailed instructions provided by the Cal-SCHLS Regional Center. A local survey coordinator plans, schedules, and monitors the CSPS. In keeping with the differences in the digital connectedness of parents in different districts, the surveys can be administered on paper forms or in an on-line format, or a mix of the two.

Parent participation is completely voluntary, anonymous, and confidential. The survey's target sample (those asked to take the survey) are generally all parents and guardians of students in all schools administering it, regardless of grade. Minimally, the survey's target sample should include the parents who have children in the grades in which students were surveyed. Table A1.1 gives the final number of parents who completed the survey. Because of the difficulty in external identification of the number of parents at any school, a participant response rate is not calculated, as it is with the student survey.

THE REPORT

The tables in the report, organized by topic, provide the percentages responding to each question response option for the whole district and by school levels in which the survey was administered (elementary, middle, high, and nontraditional). In the tables, the percentages are rounded off to the nearest full percent. Depending on the number of respondents, individual school reports can also be provided.

UNDERSTANDING THE DATA

The findings reflect the *perceptions* of parents. Some parents may have reasons to make their school look good; others, to paint an overly negative picture. The perceptions of the parents may be very different from those of students or staff—or from an independent observer of the school. This is one reason why it is important to compare CSPS results to those in the CHKS and CSCS, as discussed below. Nevertheless, parent perceptions reflect *a reality* in themselves that is important and can influence both staff and student performance.

Care must be taken to understand the factors that can impact the quality, validity, and generalizability of the results. Many factors besides real changes in behavior, attitudes, or experiences among parents may account for changes in results from administration to administration. Changes may be due to differences over time in the characteristics or number of the respondents who completed the survey, changes in the questions themselves, or differences between time periods in which the survey was administered (e.g., parental feedback may be more informed in transition grades later than earlier in the school year). A more detailed discussion of these topics can be found in the *CHKS Data Use and Dissemination Guidebook* (download chks.wested.org/using-results).

Among the most important factors affecting the quality of survey results is the level and type of target population participation. The higher the number of parents that completed the survey out of the total number you contacted, the more confidence you can have in the validity and representativeness of the

results. Even if the response rate is low, the results provide an indication of what those parents who did respond felt about the school and their experiences and behavior. Another indication of the survey's representativeness is how accurately the sample reflects the gender and ethnic composition of the district's student enrollment.

Strategies for improving parent participation are contained in the *Guidebook to the California School Climate, Health, & Learning Surveys: Administration Instructions* (download from surveydata.wested.org/resources/calschls-integratedguidebook-admin-1415.pdf). The most important over time may be to ensure that the results of the survey are communicated to parents and that parents are involved in the process of reviewing the data and determining how to improve the school (see Next Steps below).

The California Safe and Supportive Schools website provides a wealth of information and resources helpful in implementing effective strategies to improve school climate and social-emotional learning.

The Cal-SCHLS Technical Assistance Centers offer workshops to help in identifying local needs and developing action plans to meet those needs, including a *Listening to Students Workshop* for involving student voice in the process (see Next Steps below).

NEXT STEPS

Receiving this report is just a beginning step in a data-driven decision-making process. The following next steps will help in fostering effective use of the results to support school and program improvement efforts and the LCAP process.

Request School Reports

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual reports for each school (a fee applies).

Request Disaggregated Report or Analyses

The staff of the Regional TA Centers can advise on and produce reports that look at how results vary by the demographics of parents and/or their children or by other characteristics, such as how they vary by the level of parent involvement in schools, or by whether they had positive experiences compared to those with negative.

Compare Results with Student and Staff Surveys

Although the survey results should be useful to any school community when used alone, a more powerful view of the school can be obtained by comparing these findings with those from the California Healthy Kids Survey of students and the California School Climate Survey of school staff members. As part of the data review process, it is important to determine how consistent are student, staff, and parent perceptions and experiences.

Exhibit 1 below summarizes the variables assessed across the surveys. A crosswalk showing similar survey questions across the three surveys (student, staff, and parent) is posted on the Cal-SCHLS website. To enhance both survey administration efficiency and data comparability, schools are encouraged to administer the surveys at the same time.

Engage Parents in an Action Planning Process

It is very important to engage parents, along with staff and students, in reviewing and exploring the meaning of the results and obtain their input into how the school might better meet the needs identified and the development of a detailed action plan. This communicates to parents that you value their input into how to improve the school and gives them an opportunity for meaningful participation. This in itself helps enhance parent involvement. It will also promote higher rates of survey participation the next time it is administered, as parents will see how the data has been used for positive purposes.

To assist in this process, on request, Cal-SCHLS staff offer three workshops:

- a structured group Student Listening Circle in which parents (along with staff) can hear from students their perspectives on the meaning of survey results and how to improve the school and better meet the needs of students;
- a Family Forum, a semi-structured process that engages family members and school/district stakeholders in a dialogue and action planning for improving the school environment and fostering positive student-adult relationships. The Family Forum provides the opportunity for: (a) family members' voices to be heard on what can be done; (b) family members to be engaged and involved in school improvement efforts; and (c) family members to participate in a genuine parent-school-district partnership activity; and
- a *Data Use Action Planning Workshop* designed to identify local needs based on the survey results and engage stakeholders in developing a detailed plan and timetable for meeting those needs using evidence-based strategies.

For more information, contact your Cal-SCHLS Technical Assistance Center (call 888.841.7536 or email schoolclimate@wested.org). See also: californias3.wested.org/training-support/workshops/.

Add Questions to Your Next Survey

As part of your data-review process, determine what additional information is needed from parents to guide school improvement efforts and consider adding questions to your next CSPA. The survey was designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.
